Commodity Futures 28-29

## **Hogs / Pork**

- Hog slaughter this week was up 2.1% from a year ago, lower than expected. Environmental restrictions in North Carolina have limited Saturday slaughter there.
- The seasonal increase in slaughter and ongoing tariff on US pork in Mexico has pressured ham values lower.
- Pork belly prices remain high, in part because some processors have been caught short as slaughter has been smaller than expected.
- USDA lifted restrictions on Polish pork. Poland is a major belly supplier and this should help ease concerns about pork belly supply availability.
- Spring and summer hog futures continue to trend higher following more cases of African Swine Fever in China.

### **Broiler / Chicken**

- The supply of chicken breast meat remains burdensome. USDA is currently quoting boneless/skinless chicken breast at 90 cents, about 20% lower than a year ago. Market sources indicate that product has traded as substantially less than those quoted levels.
- Broiler producers are taking steps to limit supplies in the short term. The broiler hatching flock on October 1 was down 2.2 million birds (-3.6%) since June. Chick placements in the last six weeks are down 0.5% compared to a year ago.
- Seasonally prices are very weak into December but should rebound by late January/February.

# Cattle / Beef

- The choice beef cutout, an index of wholesale beef value, is up 5% compared to a year ago, with half of that increase due to higher prices for rib steak.
- Fed cattle slaughter last week was only marginally higher than a year ago despite more cattle on feed. Higher futures prices for December continue to encourage producers to limit marketings.
- Steer weights have trended lower in the last two weeks, which should limit the supply of fat beef trimmings and bolster prices.
- The value of beef rounds and chucks remains near or below year ago levels due to stiff competition at retail from cheaper chicken and pork.

### **Turkey / Other Poultry**

- Whole bird prices remain stable with adequate supplies of birds in the freezer and strong demand for hams and rib roasts.
- Hurricane in North Carolina and supply cutbacks have bolstered the price of turkey breasts.
- Turkey slaughter in Q3 was 58.6 million head, 3% lower than a year ago and 6.2% lower than two years ago. Faced with eroding demand in the deli case producers have had to cut back sharply in order to bring back a margin in their business.
- Poult placements in September were almost the same as a year ago. However, for the period Jan-Sep, monthly poult placements have averaged 1.7% lower than in 2017.
