Steiner Consulting Group

Pork Market Trends:

December hog inventory survey.

since the fall of 2009.

Chicken Market Trends:

than earlier thought.

February and March.

and foodservice promotions.

- Hog slaughter was 2.514 million head last week, 5.4%

higher than a year ago and the estimated weights were 0.6%

higher, implying pork production for the week was about 6%

- Slaughter has been above 2.5 million head in four of the

last six weeks, higher than the levels suggested by the

- The pork cutout last week was quoted under \$63/cwt,

18.5% lower than a year ago and the lowest cutout value

- Ham market remains especially weak as a combination of

high slaughter, a late Easter and Mexico tariffs pushes more

volume into the spot market. The ham cutout last week was

- Belly prices remain weak but should be higher into May as

- USDA has provided more current information on broiler

supplies and the supply situation appears to be much better

- In the four weeks ending February 9 broiler egg sets were

up 1.7% compared to a year ago while chick placements

were up 1.9%. This implies weekly broiler slaughter should

be between 1.5% and 2% higher than a year ago in late

- Chicken breast prices continue to recover, in part because

extremely low prices late last year encouraged more retail

- Broiler companies expect a more balanced mix of beef and

chicken promotions this year as beef price multiple to

chicken is extremely high. Prices for breast meat and wings

are expected to be above year ago levels while prices for

dark meat remain heavily dependent on export demand.

low prices encourage more retail and foodservice features.

down as much as 30% compared to year ago levels

higher than last year's record supply for this time of year.

Beef Market Trends:

- Feedlot conditions have been guite poor so far this year and this has negatively impacted cattle weights. So far the modest increase in slaughter has been offset by lower weights.

- Seasonally wholesale beef prices are higher in March as retailers plan promotions before the start of Lent and cattle slaughter is seasonally lower.

- The price of rounds and chucks continues to hold near year ago levels. Despite extremely low prices for pork and chicken retailers like to merchandise beef cuts due to strong consumer demand and higher revenue potential.

- Ground beef prices have been relatively low. Demand for grinding materials should improve in March and April, in part because more fast food chains are using fresh beef but also due to lower imports from Australia and New Zealand.

Turkey Market Trends

- Turkey meat supplies remain very tight. Slaughter in the last four weeks has averaged 7.5% lower than a year ago.

Based on the number of poults placed in Q4 of 2018, turkey slaughter should remain below year ago levels at least through May 2019.

- Seasonally turkey breast prices are steady in Q1. However, the continued reduction in slaughter has limited availability in the spot market and prices have gained ground in recent weeks. Turkey breast prices are now as much as 35% higher than a year ago.

- Prices for MST remain steady due to ample supplies and lower prices for beef, pork and chicken alternatives.

- Turkey dark meat prices remain weak, evidence of lagging demand for this part of the complex. Whole bird prices should be neat annual lows at this time.

NPFDA 2019 Annual Convention & Showcase

HYATT REGENCY ATLANTA SUITE 1505

Last February 12th, 13th & 14th, we had a successful business session at the Annual Convención & Show Case NPFDA 2019. Andes Global Trading suite, had the presence of important Latin American and Mexican enterpreneurs, with whom we strenghtened our commercial relationship. A special thank you to our visitors and we look forward to seeing you all at Expocarnes, Stand 1514 in the city of Monterrey.
