Pork Market Trends:

- Hog and pork prices remain under pressure as near term supplies are much higher than earlier expected while demand has fallen well short of expectations.

- The latest 'Hogs and Pigs' inventory survey points to +5% increase in supplies for the summer and while fall output could be +3.5% to as high as +4% higher than the record volume we saw a year ago.

- March-May pig crop, which corresponds to hogs available for marketing during Sep-Nov, was up 3.7%, mostly due to a significant improvement in productivity.

- Pork wholesale values are as much as 17% lower than a year ago and 2/3 of that decline is due to sharply lower pork belly prices. End users are still looking to deplete inventories they built in the spring at a time when spot supplies remain plentiful.

- China demand remains a key risk for Q4 prices, however.

Chicken Market Trends:

- Broiler industry trends show little change in recent weeks. Weak demand at retail and foodservice and an increase in broiler weights has negatively affected the price of chicken breast meat. Prices for boneless/skinless chicken breasts are down 14% compared to year ago levels.

- Broiler producers have sought to shore up their margins by limiting the number of eggs they place in incubators. Egg sets since June are up just 0.5% vs. year ago. However, improvements in productivity (higher hatching rate), has resulted in more birds coming to market. Broiler slaughter since early June has been +3% higher than a year ago.

- Good export demand and limited freezer inventories continue to support prices for leg quarters and wings. Leg quarter prices are currently 30% higher than a year ago while wing prices are currently as much as 38% higher than last year.

Beef Market Trends:

- Beef wholesale prices seasonally decline in July and August as hot temperatures reduce demand for grilling items.

- A delayed start to the grilling season and lower prices available for steak cuts in May and early June have provided retailers an opportunity to book pre and post holiday features. This has helped support beef wholesale prices in the near term

- Beef cold storage inventory remains well below year ago levels, which is also supportive of prices in the short term.

- Futures have already discounted cattle prices for delivery in August and October and market participants will focus on feedlot marketings and wholesale beef prices in order to gauge whether those discounts are warranted.

- Fat beef trim prices are firm due to strong ground beef demand. Lower prices are expected in the fall.

Turkey Market Trends

- Turkey producers have sought to keep a lid on production growth and this has resulted in some price improvement. At a time when prices for competing products are down compared to a year ago prices for most turkey items are running above year ago levels.

- Turkey breast prices are currently 8% higher than last year and should move seasonally higher in the fall. Higher y/y prices for hams and beef inside rounds remain supportive of the turkey breast market as well.

- Turkey meat exports in May were 21,325 MT, 26.4% higher than a year ago. Strong demand from Mexico (+25%) and smaller markets helped bolster turkey export demand. Limited supply growth and better export demand has helped support turkey dark meat prices, which are currently up 17% compared to year ago levels.
